

YOU CAN GROW SHRUBS AND TREES FROM SEED!

... OTHERS TELL US HOW SUCCESSFULLY
THEY DO IT!

Mr. Chas. E. Hulce
Woodlot Seed Company
Norway, Michigan

Dear Sir:

I sincerely believe that you are a reputable business organization and well qualified to give excellent service in a specialized department of seed distribution.

As a one-time Master Landscape Gardener for the Pennsylvania Railroad during the earlier years of the Twentieth Century, I grew from seeds and planted thousands of trees, shrubs and vines over the entire Pennsylvania System; from the Atlantic Coast States and westward through Pennsylvania, Ohio, Indiana and Illinois.

In conclusion, I feel that The Woodlot Seed Company could be an auxiliary to my project in the realm of unusual trees and shrubs. Together, may we be able to keep America lush and verdant.

More years to your life and more life to your years.

Sincerely yours

A. J. Bauer

Gentlemen:

Just about every seed of the Jumbo packet of Colorado Blue Spruce seed germinated into a little seedling. The rain washed most of them out for me.

However, I did succeed in saving about 200 of them, protected them a little better, mulched them for the winter with sawdust and when I transplanted them this spring the little trees had roots five to six inches long.

Very truly yours

Fr. Joseph A. Gondek

Kingsford, Michigan

Woodlot Seed Company

Dear Sirs:

Am enclosing check for \$30.00 to cover enclosed order. Am very pleased with seed received from you in past years. Now transplanting the 2 year seedlings. They sure are healthy and beautiful looking seedlings.

Yours truly

Kenneth Lindenberg

Gentlemen:

I have had real good luck with your seeds and have sold a few trees. There is a demand for them and I am going to try to meet it. Here's to better trees and lots of them.

Yours

Richard Herman

Gentlemen:

May I say that the seed that I bought from you at different times has been on the whole very good. This spring I have several hundred small seedlings from seed that was planted last spring, they came through the winter with little attention other than two or three good waterings as needed last fall and some covering with leaves after the freeze up, early in January.

Very truly yours

H. H. Davis

Villa Park, Illinois

WHO PLANTS A TREE
LOVES OTHERS
BETTER THAN HIMSELF
(Scotch proverb)

INFORMATION CHART ON FLOWERING TREES AND SHRUBS

Below is a condensed chart of information on the flowering trees and shrubs listed. The scientific name for each is shown first; then the common name. The numbers shown have been given a code meaning. For example, No. 1, height. No. 2, color of foliage in fall if distinctive. No. 3, color of flowers. No. 4, date of blooming. No. 5, is it hardy? No. 6, color of fruit. No. 7, is it evergreen? No. 8, is it broad-leaved? If in our opinion the tree or shrub is hardy as far north as the state of Massachusetts, it is marked as hardy, but hardiness should be investigated unless you plan to experiment.
